EXECUTIVE UPSKILL BRAND

OVERVIEW

Executive Upskill is a live video podcast. Three operators argue one AI decision at a time from the brand, finance and venture seats, live on YouTube, with clips on YouTube Shorts, Instagram, TikTok and LinkedIn. This page is the brand reference for people and for agents. The same facts sit in `brand.json` and in the JSON block on the Agents tab.

Positioning

Campaign line. One question. Three lenses.

Hero line. Three operators talk AI, business and brand from the seats they've held. Live on YouTube, clipped for your feed.

One sentence. Three operators argue the AI decision you are facing from the brand, finance and venture seats, live, and you can ask them in the chat.

Audience

Executives and operators who have to make decisions about AI and want to hear them argued from more than one seat: marketing and brand leaders, finance leaders, founders and investors. Guests are founders and operators who made a hard call on AI, money or brand and will defend it on camera.

What makes it different

- The hosts argue. Each makes his own call on the same question, and they disagree on camera.
- They speak from seats they have held: a marketing executive with ML patents, a finance executive of about 20 years, a fund Co-GP who runs the fund's operations on AI agents he designed.

- Viewers ask live. Questions that name a real decision get picked.
- One argument per clip, short enough for the gap between meetings.

The three lenses

BRAND

James Christopher, host and moderator.

Brand meets the bot. Asks first: "Who's the human in this loop, and can they say no?"

AI AND FINANCE

Greg Fisher, co-host.

Make the AI pay. Asks first: "Which line on the P&L moves, and when?"

VENTURE

Bryce Gilleland, co-host.

Bet before consensus. Asks first: "If this works, who keeps the money?"

Premiere

Wednesday, November 18, 2026 at 11:00 PT, 90 minutes, on YouTube Live. Episode: "Your 2027 AI Budget, Argued Three Ways". Season 1 is 12 planned episodes. The show is free.

Channels

- YouTube and Shorts: @ExecutiveUpskill
- Instagram: @exec.upskill
- TikTok: @execupskill
- LinkedIn: the Executive Upskill page

Open questions

Noted in the brand kit, not resolved. Treat each as undecided.

1. **Meta description vs hero.** `layout.tsx` says the hosts "argue AI, money and brand". The hero says they "talk AI, business and brand". "Money" and "business" are different words for the middle lens, and "argue" and "talk" are different verbs.
2. **Name of the middle lens.** CSS and tokens call it Money (`--lens-money`). Content calls it "AI and finance lens". The lens headline is "Make the AI pay".
3. **Logo accent in dark mode.** The site's React logo fills UPSKILL with `var(--accent)`, so it renders #ff5a1f in dark mode. The favicon and the standalone SVGs use #ff4d12. The kit uses #ff4d12 for the mark and #ff5a1f only for the dark wordmark.
4. **Three logo renderings use different fonts.** The in-page mark and wordmark use Archivo. The favicon, home-screen icon and share card use Anton, because the image renderer cannot read variable fonts. The two cuts look alike but are not the same.
5. **Share card background.** The card uses #161618, which is not in the palette (paper dark is #0e0e0d, logo black is #0e0e0e, Venture panel is #151515).
6. **Uppercase accent labels.** The site sets small bold uppercase labels in `--accent-ink` above headings ("Browse by lens"). The rest of the kit is silent on whether new work should keep that pattern.
7. **Handles differ by platform.** YouTube @ExecutiveUpskill, Instagram @exec.upskill, TikTok @execupskill, the LinkedIn page "Executive Upskill".
8. **Draft copy.** The lens-test takes are drafts that each host should approve before launch, so quote them cautiously. The episode titles are working titles.
9. **Greg's photos** are generated until real ones arrive, so photography guidance covers two sources.
10. **Theme color.** `viewport.themeColor` is #f7f7f5 only, with no dark value.

LOGO

The logo is a square: EXECUTIVE in off-white over UPSKILL in orange, both stretched to the same width inside a near-black square. It is the site mark, the home-screen icon and the basis for the favicon. Every file is outlined paths, so no font is needed.

executive-upskill-mark

`brand/logo/executive-upskill-mark.svg`

Primary. Black square, off-white and orange. Works on any background because it carries its own square.

executive-upskill-mark-light

`brand/logo/executive-upskill-mark-light.svg`

Paper square, ink EXECUTIVE, orange UPSKILL. For dark or photographic areas where a black square would feel heavy.

executive-upskill-mark-mono-black

`brand/logo/executive-upskill-mark-mono-black.svg`

One color #000000, letters only. Print, stamps, embossing.

executive-upskill-mark-mono-white

`brand/logo/executive-upskill-mark-mono-white.svg`

One color #ffffff, letters only. Dark or photo backgrounds. Invisible on white.

executive-upskill-monogram

`brand/logo/executive-upskill-monogram.svg`

EU monogram in Anton on #0e0e0e. Tabs, avatars, anything under 48px.

executive-upskill-wordmark

`brand/logo/executive-upskill-wordmark.svg`

Horizontal hero wordmark, ink and #ff4d12, transparent. For light surfaces.

executive-upskill-wordmark-dark

`brand/logo/executive-upskill-wordmark-dark.svg`

Same on dark surfaces: #f2f2ee and #ff5a1f.

Clear space

Keep at least 9% of the mark's width (the square's own padding, 9 of 100 units) free on every side. For the wordmark, keep clear space equal to the cap height of the letter L. These are working rules derived from the mark's built-in padding.

Minimum size

- Square mark: 32 px wide on screen, 12 mm in print.
- Below 48 px use the monogram, as the site does for the favicon.
- Wordmark: 120 px wide.

Dark surfaces

On #0e0e0d to #171716 the black square meets near-black. Draw a 2-unit stroke of white at 16% opacity (`rgb(255 255 255 / 0.16)`) around the square. The SVG files do not include it.

Do

- Place the mark on a quiet surface with its clear space.
- Use the mono white file over dark or photographic areas and mono black for one-color print.
- Use #ff4d12 for UPSKILL on the mark, and #ff5a1f only in the dark wordmark.

Do not

- Re-set the words in another font or let the two lines differ in width.
- Change colors, swap which word is orange, or put orange on a similar orange.
- Add shadows, gradients, outlines or rounded corners. The square has sharp corners.

- Rotate, skew, tilt or stretch the square into a rectangle.
- Place mono white on light backgrounds or mono black on dark ones.

COLOR

Light is the default theme. Dark applies only when asked for. The palette is off-white paper, off-black ink and one accent, the "on-air" orange. Each swatch shows light on the left and dark on the right, with its WCAG contrast against that theme's paper.

Contrast rules, measured

- **#ff4d12 on paper #f7f7f5**: 3.1:1, passes only for large display type and graphics. Never body or caption text in accent on light.
- **#b93408 (accent-ink) on paper**: 5.5:1, passes AA for small text.
- **#b93408 on white #ffffff**: 5.9:1, passes AA for small text.
- **#ff5a1f on dark paper #0e0e0d**: 6.2:1, passes for text in dark mode.
- **#ff6a33 (dark accent-ink) on #0e0e0d**: 6.8:1, passes for text in dark mode.
- **#121212 (on-accent) on #ff4d12**: 5.6:1, text on orange fills is fine.
- **#121212 on paper**: 17.5:1, body text.
- **#5a5a57 (muted) on paper**: 6.5:1, secondary text.
- **#a3a39f (muted dark) on #0e0e0d**: 7.6:1, secondary text in dark mode.

Logo colors do not change with the theme: #0e0e0e, #f2f2ee, #ff4d12. Selection is accent with on-accent text. Focus ring is 2px solid accent with a 3px offset.

TYPE

PICK THE LENS YOU NEED

Display: Archivo, width axis 62, weight 900, uppercase

```
font-family: "Archivo", "Arial Narrow", sans-serif;
font-variation-settings: "wdth" 62;
font-weight: 900;
letter-spacing: -0.01em;
word-spacing: 0.06em;
line-height: 0.88;
text-transform: uppercase;
```

Google Fonts: `Archivo:wdth,wght@62,900`. Source file: Archivo[wdth,wght].ttf in github.com/google/fonts (ofl/archivo).

Name the person who reviews the agent's work before a customer sees it. If you can't name them, you're hiring a liability.

Body: Geist

```
font-family: "Geist", ui-sans-serif, system-ui, sans-serif;
-webkit-font-smoothing: antialiased;
text-rendering: optimizeLegibility;
```

Logo fallback: Anton

```
font-family: "Anton", Impact, sans-serif;
```

Anton is for the EU monogram, the favicon, the home-screen icon and the share image, and anywhere the variable width axis is not available (slides, some video tools). It is close to the display cut but not identical. File: `src/assets/Anton-Regular.ttf`.

Scale in use

Use	Size	Style
Section headlines	clamp(48px, 6.4vw, 96px)	Display
Hero-scale headlines	clamp(56px, 7vw, 112px)	Display
Lens panel titles	clamp(44px, 3.8vw, 60px)	Display
Form headlines	clamp(36px, 3.6vw, 52px)	Display
Host names	clamp(56px, 6.6vw, 108px)	Display
Hero wordmark	container width / 7.17	Display
Hero lede	19px, 22px from md	Geist, ink-soft, tight leading
Section lede and bios	18px	Geist, ink-soft, relaxed leading
Form and card copy	16px	Geist
UI text	15, 14, 13, 12px	Geist
Buttons	14px, 600, 44px tall (48px form submits)	Geist
Small labels	13px, bold, uppercase, 0.08em tracking	Geist, accent-ink

ICONS

Lucide, pinned to lucide-static 0.577.0 (ISC license, in `brand/icons/LICENSE`). Raw SVGs are in `brand/icons/svg/`. Lucide 1.x dropped its brand icons, so this version stays pinned for YouTube, Instagram and LinkedIn. The site still uses Phosphor in code. The map below shows what replaces each Phosphor icon.

Rules

- 24px grid, 2px stroke. At 16px render use a 1.75 stroke.
- `currentColor` for stroke, no fill, round caps and joins.
- Orange accent only for live or active state (the radio icon while live, a selected control). Everything else is ink or muted.
- TikTok has no Lucide glyph. The fallback is music-2. Keep the official glyph where the platform requires it.

lens-brand

megaphone

Brand lens and the moderator seat. Matches the megaphone print on the Brand panel.

lens-money

calculator

AI and finance lens. Matches the adding-machine print on the Money panel.

lens-venture

chess-knight

Venture lens. Matches the knight print on the Venture panel.

live-premiere

radio

Live and premiere. The only icon that takes the orange accent, and only while a stream is live or a premiere is active.

episodes

list-video

Episode lists and the episodes nav item.

sessions-calendar

calendar-days

Live sessions calendar and date rows.

add-to-calendar

calendar-plus (Phosphor CalendarPlus)

Add to calendar buttons (Google, Outlook, .ics).

subscribe-rss

rss

RSS feed and podcast-feed subscribe links.

register

ticket-check

Register for a session. Pairs with the F3 Insights register link.

contact-mail

mail

Contact form, email links and the email header.

guest-pitch

mic (Phosphor Microphone)

Pitch a founder worth arguing with. Also the call-in band.

question

message-circle-question

Send my question and the ask-the-hosts form.

chat

message-circle (Phosphor ChatTeardrop)

Chat bubbles in the topic ticker. Phosphor fill weight becomes Lucide outline.

alerts-bell

bell-ring

Premiere alerts and reminders.

platform-youtube

youtube (Phosphor YoutubeLogo)

YouTube and YouTube Live channel links.

platform-shorts

youtube (Phosphor YoutubeLogo)

YouTube Shorts. The site uses the YouTube glyph for Shorts too, so the label does the work.

platform-instagram

instagram (Phosphor InstagramLogo)

Instagram channel links.

platform-tiktok

music-2 (Phosphor TiktokLogo)

TikTok. Lucide has no TikTok glyph, so music-2 is the fallback. Where the official mark is required, keep the official glyph.

platform-linkedin

linkedin (Phosphor LinkedinLogo)

LinkedIn page and host profile links.

share

share-2

Share a clip, episode or session.

external-link

arrow-up-right (Phosphor ArrowUpRight)

Links that leave the site. Alternate: external-

clock

clock

Start time and duration.

link.

time-zone

globe

Time zone label next to a start time.

seats-users

users

Seats and attendee counts.

status-open

circle-check

Session status: open.

status-limited

circle-alert

Session status: limited seats.

status-full

circle-x

Session status: full.

status-cancelled

ban

Session status: cancelled.

arrow-right

arrow-right (Phosphor ArrowRight)

Forward links and primary calls to action.

previous

chevron-left (Phosphor CaretLeft)

Calendar and carousel previous.

next

chevron-right (Phosphor CaretRight)

Calendar and carousel next.

check

check (Phosphor Check)

Selected state and confirmations.

close

x (Phosphor X)

Close dialogs, menus and filters.

menu

menu (Phosphor List)

Mobile navigation toggle.

search

search (Phosphor MagnifyingGlass)

Session search field.

refresh

refresh-cw (Phosphor ArrowsClockwise)

Reload the sessions snapshot.

theme-light

sun (Phosphor Sun)

Theme toggle, light state.

theme-dark

moon (Phosphor Moon)

Theme toggle, dark state.

Phosphor to Lucide

MagnifyingGlass	search
ArrowsClockwise	refresh-cw
Sun	sun
Moon	moon

Gaps: Phosphor TiktokLogo has no Lucide match (music-2 is a stand-in). The site renders brand logos and ChatTeardrop, Microphone, MoonIcon and SunIcon in Phosphor fill weight, and Lucide is outline only, so those look lighter after the swap.

PNG sets for lens and platform icons at 24, 48 and 96 px, in ink and paper colors, are in `brand/icons/png/`.

VISUAL LANGUAGE

Shapes

Cards and panels have a 16px radius. Buttons and chips are full pills. Inputs are 12px. Nothing else. Focus outlines use a 6px radius. Avatars are circles with a 2px ring at 20% of the current color.

Buttons

Four pills: primary (accent fill, on-accent text, turns ink on hover), dark (ink fill, turns accent on hover), outline (1px ink border, fills ink on hover) and text (no fill, underlined). One filled button per area.

Lens panels

A 16px card with an inset printed-card border: a 6px inner band in the panel color, then a 2px ring in the ring color. Display title, host avatar chip, a linocut print rotated -6 degrees (straightens on hover), and episodes divided by hairlines in the current text color at 15% opacity.

Grain

A film grain over the page: SVG fractal noise, baseFrequency 0.9, 2 octaves, 160px tile, 5% opacity in light and 7% in dark, non-interactive. The banners and the title and end cards use it. Share card, email header, lower thirds and slides stay flat.

Illustration

Single-color linocut prints traced to SVG, drawn with `fill="currentColor"` so they take the text color of the panel: megaphone (Brand), adding machine (Money), knight (Venture), microphone. Keep them adult. The icon set matches them: megaphone, calculator, chess-knight.

Photography

Candid home-studio frames of the hosts: three-quarter at the mic, a laughing side profile, square face crops for avatars. Host cards are 3:4 with a 16px radius and a scrim gradient rising over the lower 64%. Greg's photos are generated until real ones arrive.

Motion

Item	Value
Easing	`cubic-bezier(0.16, 1, 0.3, 1)` (ease-out-expo)
Wordmark rise	0.9s, 28ms stagger per letter, once on load
Disclosure height	0.35s with the same easing
Buttons	200ms ease-out, 0.98 press scale
Marquee ticker	38s linear loop
Live indicator	pulsing accent dot
Reduced motion	all of the above off under `prefers-reduced-motion: reduce`

Layout habits

Content container max 1400px with 16, 24 and 32px side padding by breakpoint. Sections start 96 to 128px apart. A section opens with a hairline row, then a large uppercase display headline, then a lede. Scroll padding is 88px under a sticky nav.

Surfaces

Web, email and slides default to light paper. Social profile art, banners and video cards sit on the logo black (#0e0e0e) with off-white and orange. The share card uses palette colors only.

VOICE AND MESSAGING

Direct and specific, spoken by people who have done the job. It asks a pointed question, gives a concrete test and skips the pitch. Confident and a little dry in headlines, plain and helpful in forms and FAQ, never hype.

Real lines

Short, concrete, second person

"Name the person who reviews the agent's work before a customer sees it. If you can't name them, you're hiring a liability."

Money talk is plain arithmetic

"Price the agent with the hours someone spends checking its work. Compare that number to the salary, then decide."

Takes a side

"Rebrand around the problem you own, so you still stand out when your competitors say AI too."

Clips state the payoff

"One argument per clip, short enough for the gap between meetings."

Calls to action are verbs and promises

"Ask, and we'll argue it live."

Host takes are first person

"I run my fund's operations on agents I designed. Start with a workflow you can write down step by step."

Calls to action in use

Get premiere alerts. Know when we go live. Set YouTube reminder. Subscribe on YouTube. Watch Shorts. Follow on Instagram. Follow on TikTok. Follow on LinkedIn. Send my question. Pitch a founder worth arguing with. Meet the hosts. Join Season 1. Pull up a chair.

Section headlines in use

Pick the lens you need. Watch live or catch the clips. Meet the hosts. Ask, and we'll argue it live. Know when Episode 2 goes live. Display headlines are short and uppercase.

Words we use

operators, seats, lens, argue, call (as in "make the call"), live, clip, pilot, P&L, margin, moat, review gate, human in the loop, decision, "argued three ways".

Rules

- **No dashes.** Never write an em dash, an en dash or a horizontal bar (U+2014, U+2013, U+2015). Use a comma, period, colon, parentheses or a rewrite. Numeric ranges take a hyphen (0-4).
- **No banned terms.** The hard-ban list is in `~/.claude/standards/anti-ai-banned.txt` and in `brand.json` under `voice.bannedTerms`. It covers stock transitions, copula dodges, buzzwords, brochure tone and filler openers and closers. Name the person, the number or the decision instead of a vague claim about AI "transforming" things.
- No antithesis frames, no semicolons in copy, no hedging, no recap closers.
- No eyebrow labels above headings. A label stays only when it carries data: a status, a category, a unit.
- Vary sentence length. Contractions are normal ("you're", "we'll").
- The lens-test takes are drafts each host must approve. Quote them with care. Episode titles are working titles.

ASSETS

Every asset is an SVG with outlined text plus a PNG at the exact pixel size, in `brand/assets/`. Rebuild with `brand/scripts/build-all.sh`. Do not edit the SVGs by hand.

File	Pixels	Use
`brand/assets/profile/profile-1080.svg` `brand/assets/profile/profile-1080.png`	1080 x 1080	Instagram, TikTok and LinkedIn page profile picture. Letters sit inside the inscribed circle.
`brand/assets/profile/profile-800.svg` `brand/assets/profile/profile-800.png`	800 x 800	YouTube channel profile picture. Same art, circle-safe.
`brand/assets/banners/linkedin-cover-1128x191.svg` `brand/assets/banners/linkedin-cover-1128x191.png`	1128 x 191	LinkedIn page cover. Left 300px stays clear for the page logo.
`brand/assets/banners/x-header-1500x500.svg` `brand/assets/banners/x-header-1500x500.png`	1500 x 500	X header. Content sits right of center, clear of the avatar.
`brand/assets/banners/youtube-banner-2560x1440-safe-area-guide.svg` `brand/assets/banners/youtube-banner-2560x1440-safe-area-guide.png`	2560 x 1440	Same banner with the safe area marked. Reference only, do not upload.
`brand/assets/banners/youtube-banner-2560x1440.svg` `brand/assets/banners/youtube-banner-2560x1440.png`	2560 x 1440	YouTube channel art. Key content inside the 1546 x 423 safe area.
`brand/assets/social/og-share-card-1200x630.svg` `brand/assets/social/og-share-card-1200x630.png`	1200 x 630	Open Graph and share card. Palette colors only.

File	Pixels	Use
`brand/assets/email/email-header-1200x300.svg` `brand/assets/email/email-header-1200x300.png`	1200 x 300	Email header at 2x (shows at 600 x 150).
`brand/assets/video/end-card-1920x1080.svg` `brand/assets/video/end-card-1920x1080.png`	1920 x 1080	End card: Subscribe and the five platform names with handles.
`brand/assets/video/lower-third-bryce.svg` `brand/assets/video/lower-third-bryce.png`	1920 x 1080	Lower third, Bryce Gilleland, co-host, Venture lens. Transparent PNG.
`brand/assets/video/lower-third-greg.svg` `brand/assets/video/lower-third-greg.png`	1920 x 1080	Lower third, Greg Fisher, co-host, AI and finance lens. Transparent PNG.
`brand/assets/video/lower-third-james.svg` `brand/assets/video/lower-third-james.png`	1920 x 1080	Lower third, James Christopher, host and moderator, Brand lens. Transparent PNG.
`brand/assets/video/title-card-1920x1080.svg` `brand/assets/video/title-card-1920x1080.png`	1920 x 1080	Video title card with the premiere episode title and date.
`brand/assets/slides/slide-content-dark-1920x1080.svg` `brand/assets/slides/slide-content-dark-1920x1080.png`	1920 x 1080	Content slide background, dark.
`brand/assets/slides/slide-content-light-1920x1080.svg` `brand/assets/slides/slide-content-light-1920x1080.png`	1920 x 1080	Content slide background, light.

File	Pixels	Use
`brand/assets/slides/slide-title-dark-1920x1080.svg` `brand/assets/slides/slide-title-dark-1920x1080.png`	1920 x 1080	Title slide background, dark.
`brand/assets/slides/slide-title-light-1920x1080.svg` `brand/assets/slides/slide-title-light-1920x1080.png`	1920 x 1080	Title slide background, light.

Logo files

File	Use
`brand/logo/executive-upskill-mark.svg`	Primary. Black square, off-white and orange. Works on any background because it carries its own square.
`brand/logo/executive-upskill-mark-light.svg`	Paper square, ink EXECUTIVE, orange UPSKILL. For dark or photographic areas where a black square would feel heavy.
`brand/logo/executive-upskill-mark-mono-black.svg`	One color #000000, letters only. Print, stamps, embossing.
`brand/logo/executive-upskill-mark-mono-white.svg`	One color #ffffff, letters only. Dark or photo backgrounds. Invisible on white.
`brand/logo/executive-upskill-monogram.svg`	EU monogram in Anton on #0e0e0e. Tabs, avatars, anything under 48px.
`brand/logo/executive-upskill-wordmark.svg`	Horizontal hero wordmark, ink and #ff4d12, transparent. For light surfaces.
`brand/logo/executive-upskill-wordmark-dark.svg`	Same on dark surfaces: #f2f2ee and #ff5a1f.

PNG exports of the logo are in `brand/logo/png/`. Tokens are in `brand/tokens/tokens.json` and `tokens.css`.

AGENTS

Follow every line when you make Executive Upskill material. The full spec is in the JSON block below and in `brand/brand.json`.

- [ ] Use only the logo files in brand/logo. Never retype the name in a font, recolor it, add effects, or stretch the square.
- [ ] Respect clear space (9% of mark width) and minimum sizes: mark 32 px, monogram under 48 px, wordmark 120 px.
- [ ] Colors come from brand/tokens/tokens.json. Web, email and slides default to light. Use dark only when asked.
- [ ] Small text in the accent color uses accent-ink (#b93408 light, #ff6a33 dark). #ff4d12 is for fills, icons and display type.
- [ ] Headlines use the display cut: Archivo wdth 62, weight 900, uppercase, -0.01em, line-height 0.88. Body is Geist. Anton only where the width axis is unavailable.
- [ ] Shapes: cards and panels 16px radius, buttons and chips full pill, inputs 12px. Nothing else.
- [ ] Icons are Lucide 0.577.0 from brand/icons/svg: 24px grid, 2px stroke (1.75 at 16px), currentColor, round caps. Orange only for live or active state.
- [ ] Lens colors follow the theme. Brand is orange, Money is concrete, Venture is ink in light and inverts in dark.
- [ ] Use real copy only: the hero line, the show name, the campaign line, the host names and roles from src/content/hosts.ts, the premiere date Wed Nov 18 2026 11:00 PT.
- [ ] Never write an em dash, en dash or horizontal bar (U+2014, U+2013, U+2015). Numeric ranges use a hyphen.

- [ ] Check copy against voice.bannedTerms. No antithesis frames, no semicolons in copy, no hedging, no recap closers.
- [ ] No eyebrow or kicker labels above headings. Copy fills its container width: size the container, not the paragraph.
- [ ] Share cards use palette colors only. Do not use #161618.
- [ ] Channel handles: YouTube @ExecutiveUpskill, Instagram @exec.upskill, TikTok @execupskill, LinkedIn page Executive Upskill.
- [ ] Lens-test takes are drafts and episode titles are working titles. Quote them with care.
- [ ] Motion uses cubic-bezier(0.16, 1, 0.3, 1) and switches off under prefers-reduced-motion.
- [ ] Regenerate assets with brand/scripts/build-all.sh instead of editing SVG or PNG files by hand.
- [ ] Treat the open questions as undecided. Do not settle them inside a deliverable.

Machine-readable spec

The block `script#brand-data` holds tokens, fonts, logo files, icon map, asset paths, voice rules and open questions.

The full machine-readable spec is in brand/brand.json and in the HTML version of this guide.
